

## Nivo-Slider

John Russo here, the main reason I chose the Nivo-Slider by dev7studios was its simplicity. It's lightweight, quick and easy to configure. Plus the fact that my family and I just had some new photos made and my wife wanted a way to display them for the rest of the family. I thought it would be a pretty great idea.

I've really enjoyed this assignment for the simple fact that it made us go out there and actually see how many plugins and frameworks are available. You weren't kidding there are literally tons of them for pretty much each and everything you would like to do.

Thank you,  
John Russo
